PLEASE NOTE

- This service is a mist applied to all surfaces and does not include wiping down or using cloths to apply the solution.
- Solution is EPA-approved but not FDA-approved, so all food must be covered or put away in areas of spraying.
- Although area will be safe to walk through within minutes, people should not be in the area while solution is being sprayed/misted.
- After misting, solution will take about 15-30 minutes to dry, depending on how heavy the solution was applied as well as the surface material.

SDS for the disinfectant solution is available upon request.
